EN

In the 70s, Ceramica Nulense started its industrial activity with 32 people, an area of 60,000 SQM of industrial land and the wonderful challenge of devising, creating, and manufacturing its own ceramic products, of the highest quality and the best price.

Currently, and thanks to a constant investment and expansion policy, STN Ceramica occupies more than 1,000,000 SQM of industrial land, has a production capacity of more than 100 million SQM per year, has a presence in 130 countries and employs more than 1,300 people, making it the 2nd European ceramic manufacturer and 8th world manufacturer according to the data provided by the prestigious Ceramic World Review (2021 data). The constant modernization of the industrial plants allows STN Ceramica to be a leader in competitiveness and in manufacturing capacity for all types of ceramic products.

Against the paradigm that companies focused on the continuous improvement of productivity experience issues related to quality and design, at STN Ceramica we consider QUALITY and DESIGN fundamental pillars in our strategy, and this is demonstrated in all our products. For this, a constant investment in the modernization of equipment, perfectly prepared staff and an endowment of state-of-the-art resources are necessary in the Development, Quality and Marketing departments.

This trajectory makes STN Ceramica the perfect choice, offering a competitive product that combines design, quality, technology, and versatility.
